

Easily join the 60% of insolvency administrators who get more money and more time back by using our software

(email preview line):

Over 60% of Czech insolvency administrators are using our software and report success with it.

We have gathered the statistics and numbers don't lie:

Over 60% of Czech insolvency administrators are using our software and report success with it.

In fact, we have also gathered the most common benefits insolvency administrators report having with our solution:

- They get 10-20% more cases now at minimum - with no extra cost (while other software charges you per case, or you pay with your time with DIY spreadsheets).
- They have more time for growing their businesses:
 - getting started is easy and usually under an hour, no need to rewire your workflow,
 - no IT staff needed - as long as you can enter numbers and names in descriptive columns,
 - having peace of mind - just enter the numbers and let automatic calculations work,
 - hitting quota with no stress - automatic payments and reminders,
 - spending zero time on automatic repetitive tasks and e-mails,
 - automatic cloud sync, but when offline, the software still works.
- No more overhead (unheard of in insolvency administration area before):
 - direct link with legislature and court systems - no expensive commercial registrar extracts, no phone calls and letters waiting for someone's reply,
 - changes and updates in law get automatically processed,
 - data is safe with mil-spec encryption, whether in our cloud, or locally with you (with easy migration to our cloud when you're ready),
 - peace of mind having 24/7 customer support.

Despite all of the above, our software is cheaper than any other solution on the market. We made that possible by having systems (and great dev team) in place - like you will have with us. It adds up, right?

Software for your job is not something that should be an expense - it should bring you high ROI instead, as in, actually making you money. Not paying "just because ransom" to keep the business going.

Easily see for yourself - just reply to this e-mail and we will send you the free trial sign-up. No credit card, no registering and no pressure.

In fact, almost 80% of our users report they understood the software in less than an hour, thanks to the auto-installer with everything explained. If you are used to working with spreadsheets, you will do just fine.

But instead of promises, see what our customers have to say about us:

Getting IR-IS was pivotal. I thought I had zero time wasted policy, but when I see what I thought were mandatory daily upkeep tasks, now done on autopilot... I regret not having done this earlier to save me the time.

It is amazing - however many cases I get (and now before EOY 2019 it is super hectic as always), the system keeps doing the usual as when I have just two or three. Super helpful.

I thought I was the one supposed to watch over law changes, reminding clients to deposit on time... I was wrong.

60% of the Czech market - the numbers don't lie. Try us out - you will be in a good company.

This offer is *not* time-limited (you knew there was a catch!).

But you owe it to *your time*, which *is* limited. Save great deal of that time and make greater deal of money. Despite popular saying, you can and you *should* have both.

Looking forward to see you with us,
Radek Stefanic, Aret CEO

ps: Really, just reply to this e-mail and we will take care of the rest. No payment, no contract, no time wasted. Promise.
